

Home, Sweet Home

What we already know:

We can remember there are lots of continents and one is Africa. We live in Europe.

We know what plants need to grow.

We think meerkats live in the desert.

In English we will write non-chronological reports about habitats and send a new postcard from Sunny. We will also be writing leaflets about Eid.

In Art we will draw realistic representations of meerkats using pictures and real meerkats as inspiration.

In RE we will learn about sacred books from different religions.

In Music we will compose and perform musical patterns and listen to African music.

In Computing we will learn how to keep ourselves safe online.

We will use computer programs to display data about the weather.

In Geography, children will learn about different climates around the world.

Children will describe differences between Longsight and Nairobi.

In Science we will recognize different habitats and the animals and plants that live there. Children will describe how these habitats meet the needs of different animals.

What we want to learn:

What do meerkats eat?

What is it like in Africa?

Do meerkats like hot weather?

What does African music sound like?

St. Agnes C of E Primary School

Year Two

Summer 1 2022

What makes a home?
