

What do we already know?

What do we want to learn?

In Geography, children can create their own treasure maps using keys

They can follow maps using compass points and landmarks and use aerial photographs to recognise human and physical features.

In Music, children can sing a range of sea shanties and compose their own.

In Art, children can study and draw portraits using different media and elements such as line, shape and colour.

In Computing, children can use pictograms to record data.

In English, children can write adventure stories based on The Story of Pirate Haider. They can also write instructions using a range of sentence types.

In Science, children will identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses. They can find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching. They will use their knowledge of materials to design and build a pirate ship.
