

Summer 2
Year 3
Growing and changing

In Geography, we will use maps to investigate and justify how and why our local area is changing.

In English, we will learn about a traditional tale and plan, write and edit our own stories.

In PE, we are learning about volleyball where we will be developing our running, jumping and throwing skills.

In Science, we will investigate parts of plants, how water is transported through them and the role of flowers in the plant lifecycle.

In Art, we will practise and refine our drawing and sketching skills using different media to achieve different effects.

In Maths, we are learning to count, add and subtract amounts of money and learn how to give change.

In RE, we will be learning about what it means to be a Christian in today's world.
