

Year 4 Summer 1 Overview

How Can We Live More Sustainably?

Science

In Science, we will investigate electrical circuits and find out about renewable and non-renewable energy sources.

Maths

In Maths we will be continuing to work on column multiplication, as well as division and fractions.

Geography

In Geography, we will be learning about sustainability by investigating recycling, different types of energy production and how our world is effected by environmental change.

Art

We will be reusing materials to create sculptures and learning about artists who using non-recyclable objects in their work.

RE

In RE, we will be looking at right and wrong and the rules that different religions have to help people live good lives.

ICT

In ICT, pupils will be focusing on being able to use spreadsheet software. Pupils will format cells and use formula to calculate averages.

Music

In Music, we will be analysing and listening to music to help us create our own compositions using a series of simple chords.

PSHRE

In PSHRE we will be exploring risk management, understanding how to exercise self control and investigating the benefits and dangers of drugs.

English

In English we will be writing a chronological recount as well as using persuasive language to create instructional texts about recycling.
